

Workflow Automation Case Studies

LinkedIn Outreach Case Study

Advertising Case Study

Paid search/display ads target relevant keywords and audiences to drive traffic from people actively searching for the product or service.

Landing Page

Clicking the ad sends the visitor to a dedicated landing page designed to convert traffic from that specific campaign.

Lead Form

The visitor fills out a form on the landing page, submitting contact details and other qualifying information.

CRM

Form submissions flow automatically into the CRM, creating a new lead record without manual data entry.

Lead Score

The lead is automatically scored based on attributes (company size, budget, engagement, etc.) to gauge sales-readiness.

Salesperson Assigned

Based on the score and routing rules, the lead is automatically assigned to the appropriate salesperson or team.

Cron Job generates daily report

A scheduled job compiles a daily report of new leads, scores, and assignments so the team can track pipeline performance.
